DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 03 February 2004 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 29 is rejected under 35 U.S.C. 102(b) as being anticipated by Higashiura et al. (5,816,610).

Higashiura et al. discloses an airbag inflator diffusion system comprising: an airbag inflator (24); and a tubular sleeve (airbag 32 is broadly a “tubular sleeve”) for receiving the inflator, the sleeve having a first longitudinal edge (32A) that overlaps a second longitudinal edge (32B) along a length of the sleeve (see Figure 1), the sleeve expands radially under a force of impinging exhaust gas (as in Figure 8) to form an exhaust passage (mouth of airbag next to inflator forms the “exhaust passage”) between the inflator and the sleeve.
